Driven software developer with a background in front end and back end web development.

WORK EXPERIENCE

Created front end web applications using HTML, CSS, and JavaScript. Implemented back end functionality with frameworks and databases using Flask, Django, Rails, Mongo DB, Mongoose, and SQLite. Worked on web applications and algorithms in a team setting, and also adapted to working independently in a remote working environment.

Most of my work experience comes from the veterinary field, but I am working to transition into programming. I gained experience and grew my knowledge of coding when I attended the Coding Dojo and TEKCamp bootcamps. I am continuing to keep information fresh, learn new skills, and create new projects with Free Code Camp and many other online resources.
